FIRST FIT

Aim:

To write a C program for implementation memory allocation methods for fixed partition using first fit.

Algorithm:

1. Define the max as 25.
- 2: Declare the variable frag[max],b[max],f[max],i,j,nb,nf,temp, highest=0, bf[max],ff[max]. 3: Get the number of blocks,files,size of the blocks using for loop.
- 4: In for loop check bf[j]!=1, if so temp=b[j]-f[i]
- 5: Check highest

Program Code:

```
#include <stdio.h>

#define max 25

int main() {
    int frag[max], b[max], f[max], i, j, nb, nf, temp;
    int bf[max], ff[max];

    // Input
    printf("Enter the number of blocks: ");
    scanf("%d", &nb);

    printf("Enter the size of the blocks:\n");
    for (i = 0; i < nb; i++) {
        printf("Block %d: ", i + 1);
        scanf("%d", &b[i]);
        bf[i] = 0; // initially all blocks are unallocated
    }

    printf("\nEnter the number of files: ");
    scanf("%d", &nf);

    printf("Enter the size of the files:\n");
    for (i = 0; i < nf; i++) {
        printf("File %d: ", i + 1);
        scanf("%d", &f[i]);
    }
}
```

```
    }

    // First Fit Allocation
    for (i = 0; i < nf; i++) {
        for (j = 0; j < nb; j++) {
            if (bf[j] == 0 && b[j] >= f[i]) {
                ff[i] = j;
                frag[i] = b[j] - f[i];
                bf[j] = 1; // mark block as allocated
                break;
            }
        }
    }

    // Output
    printf("\nFile_no\tFile_size\tBlock_no\tBlock_size\tFragment\n");
    for (i = 0; i < nf; i++) {
        printf("%d\t%d\t", i + 1, f[i]);
        if (bf[ff[i]] == 1)
            printf("%d\t%d\t%d\n", ff[i] + 1, b[ff[i]], frag[i]);
        else
            printf("Not Allocated\n");
    }

    return 0;
}
```

OUTPUT:

```
Enter the size of the blocks:
Block 1: 5
Block 2: 8
Block 3: 4
Block 4: 10

Enter the number of files: 3
Enter the size of the files:
File 1: 1
File 2: 4
File 3: 7

File_no File_size      Block_no  Block_size  Fragment
1       1              1         5           4
2       4              2         8           4
3       7              4         10          3
```

RESULT:

Hence, First Fit memory allocation technique using Python has been implemented.
